

PRESS RELEASE

DTI S.R.L. ENTERS IN THE SHARE CAPITAL OF AME S.R.L.

Strategic partnership between the two companies to build Friuli's new technology hub

Udine, 18 gennaio 2023. DTI S.r.l., international EMS (Electronic Manufacturing Services) based in Udine, Italy, announces the conclusion of a binding agreement for a 20% entry into the capital of AME S.r.l., a company specializing in the design and manufacture of integrated electromechanical systems.

The transaction is characterized by the high degree of complementarity between the two companies' offerings; thanks to their different specializations in engineering, it will be possible to create new synergies for growth in their target markets. The two Friulian companies will form an important new hub for the area and will be able to pool the technological component, which is vital for both companies, optimizing developments and new implementations.

AME S.r.l. was founded in 2010 in Palmanova, gathering know-how and high *expertise* in the fields of electronics and mechatronics. Over time it qualifies on the market not only for the realization of embedded electromechanical systems but also for remote monitoring and *human-machine interface solutions*.

Alessandro Mattaloni, CEO and project manager of AME, will remain with the company, as will the entire team.

"In line with our 21-26 Business Plan, the entry into the share capital of AME confirms DTI's strategic project," commented Alessandro Dalla Torre, CEO and Co-Founder of DTI S.r.l. - aimed at developing new applications to support business expansion, positioning more strongly in markets of interest and enhancing partnerships in the territory. We have known the AME team for some time now thanks to the valuable collaborations established over the years, and we are aware of the invaluable added value acquired with the professionalism of its resources."

AME's Alessandro Mattaloni added: *"With this step it will be possible to integrate new competencies and enrich the solutions offered to our clients, being able to count on know-how and shared values such as the drive for innovation and experience sharing. Thanks to DTI we will be able to count on new, more structured business outlets."*

DTI S.r.l.

DTI is an international EMS (Electronic Manufacturing Services) offering innovative and high-quality technology solutions. It designs, tests and manufactures custom electronics, wiring harnesses and mechanics for the professional appliance and automotive sectors. With more than thirteen years of activity and two production sites (one in Udine and the other in Hungary), today DTI has more than 70 employees including 15 people involved in the R&D department.
