

KEYBOARDS

The design of interfaces and products is a constantly evolving field, especially in recent years. DTI's approach is **user-oriented**, and our know-how has allowed us to develop, based on market needs, **different TYPES of keyboards** that are simple to use and highly functional.

Graphic design makes them unique, and our technicians are available for any **UX and UI customizations** to provide the best product for each specific usage environment.

TYPES

CAPACITIVE KEYBOARDS

Capacitive keyboards are made using **high-quality materials** that ensure **long-lasting** durability while offering a **highly competitive** product.

It is possible to customize dimensions and graphics according to specific needs, and each capacitive key can be equipped with an indicator LED or backlighting.

MECHANICAL KEYBOARDS

DTI switch keyboards are push-button keyboards that are **easy to use and highly functional**. Each button is accompanied by an indicator LED, making operation intuitive and immediate. Ready-to-use solutions are available, already implemented by DTI, or can be customized based on specific graphic and functional requirements.

HIGHLIGHTS

3 or 6 keys

RGB LED lighting

Plexiglass or glass

RS485

Setup adjustment

Smart grid

Tropicalization

TECHNICAL FEATURES

CAPACITIVE KEYBOARDS

5V power supply

Backlit button

Compatible with push-button electronics

Software tested for electrical disturbances

Protection against cloth, steam, and water droplets

MECHANICAL KEYBOARDS

5V-12V power supply

Backlit button

Direct LED control

High-quality and durable materials
